

MANAGE YOUR CAR TERMINAL WITH EASE

Combining advanced software with multiple identification, positioning and telemetric technologies, Asset Agent from IDENDEC SOLUTIONS is a robust platform that enables real-time visibility, monitoring and control of all car movements and handling processes at a car terminal. Created as a modular solution that covers several areas of operations, Asset Agent is ready to improve your RoRo operations.

To help transform the way car terminals manage import-export processes and establish sustainability, IDENDEC SOLUTIONS delivers real-time systems based on more than 20 years of experience, designed to integrate into your infrastructure and operations characteristics - Asset Agent is a fit for brown or green field, ready to communicate with several Terminal Operating Systems.

ASSET AGENT MODULES OVERVIEW

Vehicle registration when embarking

Identify the right car for the loading process immediately, know which driver drove which car and understand the status of the car carrier loading operation in real-time.

Car location when parked

Know the correct parking spot of every car on your premises - automatically and in real-time using the VIN whenever you move vehicles.

Car pick-up for hinterland transfer

Assign car jobs to drivers, register vehicles when loaded on the truck and know which cars have been moved in real-time and automatically.

Car customization after disembarkment

Register new cars at your yard in real-time when disembarked from a vessel, identify their parking spot and record all customisation work automatically.

Car delivery by train

Register new cars at your premises in real-time when arriving by train/trailer and record their parking spot automatically.
