WHAT WE DO

Productivity challenges come in many shapes and forms – not knowing where people are, time lost searching, material going to waste, components lost, important data not available, manual checking and monitoring, replacing of parts... At Identec Solutions, we identify where the problems are and create solutions to **eliminate wastefulness**.

Our products keep people safe, make teams work better, save money, deliver valuable insights, put our customers in control, and increase their productivity. That's why the world's biggest and most productive ports, mines, energy operators, automotive suppliers, and carmakers trust us to help them better utilise the resources they have.

INDUSTRIES & CUSTOMERS

Turn-key solutions provider
for harsh and hazardous environments

- Smart Factory
- Safe Energy
- Safe Mining
- Marine & Ports

500+

Active customers across 50+ countries

10+ years

Typical customer relation duration

ENGINEERING IDEAS TO IMPROVE EFFICIENCY AND SAFETY

Smart Factory

- IIoT based productivity booster in non-conveyor belt mass production
- Reduces labour time and scrap of material while increasing machine utilization

Keeps **50,000+** assets on the move every day

Marine & Ports

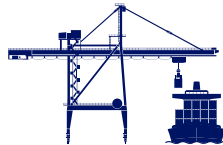

- Remote refrigerated container monitoring and control solution
- Reefer Runner manages the entire reefer process in container terminals
- Reefer Runner 5G manages reefers along the complete cold chain on the go

Manages **50,000+** reefer containers every day

Efficiency

Marine & Ports

- PDS-based container management system for accurate inventory and optimised gate, yard and quay management
- Increases visibility, safety, and productivity and controls waste by monitoring assets

Manages **100,000+** container moves every day

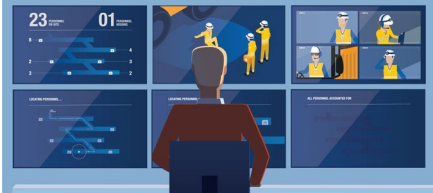

Safe Mining

Safe Energy

- Real-time visibility of personnel on offshore assets and in underground mines
- Exceeds regulatory requirements to maximize safety, security and productivity

Keeps **60,000+** workers safe every day
